PROFILE SUMMARY

Computer Scientist with practical experience in database management, data quality, project coordination, and monitoring & evaluation. Currently part of a remote team at YENDA, after a period leading a group of 25 people and keeping quality above client targets. Comfortable with SQL, databases, and basic software development, and used to working with field data, reports, and people from different backgrounds. Looking to put these skills to use solving real problems for a team.

WORK EXPERIENCE

YENDA | **Remote, Freelance** Mar 2025 – Present

Role changed a few times as the organization grew and later restructured.

Data Annotator — Apr 2026 – Present

Back to annotation work after the organization restructured and the Project Lead role was phased out.

- Process and check structured and unstructured data for accuracy.
- Follow quality standards closely while working through large datasets.
- Help prepare data that's later used for machine learning work.

Project Lead / Data Quality Specialist — Jan 2026 – Apr 2026

- Led a team of about 25 people, checking in on their progress day to day and making sure work met project requirements.
- Kept quality above the client's 95% target — the team's work usually sat around 95–97%, thanks to regular checks and feedback.
- Watched team output to spot people who were falling behind, then worked with them directly to get back on track.
- Reported progress and quality issues to management and the client, and flagged anything that could affect deadlines.
- Planned out daily workloads and chased up unfinished tasks so the team stayed on target.

Quality Checker (QC) — Oct 2025 – Jan 2026

- Checked data for accuracy and consistency as part of regular quality reviews.
- Spotted recurring issues and suggested ways to fix them.
- Made sure work followed the project's documentation and quality procedures.
- Gave detailed feedback that fed into ongoing process improvements.

Data Annotator — Mar 2025 – Oct 2025

- Processed and checked structured and unstructured datasets.
- Kept data accuracy and consistency high across the work.
- Worked with large datasets under strict quality standards.
- Helped prepare data used in machine learning applications.

Cashier | **TotalEnergies** **Jun 2025 – Sep 2026**

Part-time, in-person role held at the same time as the remote work at YENDA.

- Handled customer transactions and kept sales records accurate.
- Served customers, answered questions, and helped keep the service area organized and welcoming.
- Recorded daily sales properly so the figures were ready for reporting.
- Helped the team hit about 80% of the sales-record target tracked during my time there.

Assistant Monitoring & Evaluation Officer | **Vision Africa Regional Network Zambia2024 – 2025**

- Helped implement a UNICEF-funded Water, Sanitation and Hygiene (WASH) project, tracking progress across 6 provinces and over 32 districts.
- Visited rural communities to check on project activities, inspect sanitation facilities like household toilets, and see how things were progressing against plan.
- Collected and cleaned up project data from different districts so it stayed accurate for reporting and decisions.
- Worked closely with the Project Manager, flagging problems in the field and helping keep the project on track.
- Kept monitoring records up to date, including data on health workers running community-level activities in rural areas.
- Helped the project reach about 80% of its targets through field monitoring, data work, and coordination with stakeholders.

SELECTED PROJECTS

Sales Management System

- Built a system for managing inventory, customers, sales transactions, and reporting.
- Technologies: JavaScript, React, MySQL.

Automated SIM Card Configuration System Final-year project

- Built a web-based system to automate SIM card configuration, cutting down on manual work.

SKILLS

Core Skills

- Database Management
- SQL / MySQL
- Data Validation & Cleaning
- Data Quality Management
- Data Collection & Analysis
- Microsoft Excel (Advanced)
- Data Reporting

Professional Skills

- Project Coordination & Leadership
- Communication
- Problem Solving
- Attention to Detail
- Time Management
- Documentation
- Stakeholder Communication

Software Development

- Python (Intermediate)
- Java, JavaScript
- HTML, CSS
- Git & GitHub

Languages

- English — Fluent
- Bemba — Fluent
- Nyanja — Fluent

EDUCATION

Bachelor of Science in Computer Science | Cavendish University Zambia 2021 – 2025
Completed academic requirements; final transcript and certificate pending administrative clearance.

Grade 12 School Certificate | Chitamba Secondary School

CERTIFICATIONS

- Artificial Intelligence — State University of New York
- Web Development — State University of New York
- Operations Research — National Taiwan University
- Microsoft Excel — Coursera
- Programming with JavaScript, HTML and CSS — Duke University
- Machine Learning with Python — IBM

REFEREES
